Leadership
 Strategy
 Quantitative

*These courses are offered during the same quarter.

This 60-credit online program can be completed in as few as 21 months. Participation in two immersions/experimentals is required for graduation.

This is a self-paced curriculum. Students can determine how many classes to take each quarter and can choose not pursue a concentration. Please work with your advisor.

Online MBA courses require both synchronous and asynchronous work. Synchronous work refers to the weekly live sessions that accompany Online MBA courses.

Asynchronous work refers to the self-paced coursework that students complete on their own.

Each course requires a 90-minute live session each week, affording students the unique opportunity to interact with each other and the instructor in real time.

Finance, marketing and executive leadership concentrations can be completed online. Accounting, business analytics, and real estate and the built environment concentrations are currently only available to those students who can take on-campus courses. Students also have the option to complete a customized (self-designed) concentration.

Please note: This course sequence is subject to change.
